

# WORKSHOP

Dear faculty members:

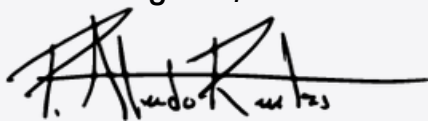

In honor of the International Day of the Girl, Caribbean Robotics Academy will host the EmpowerHER Workshop, to encourage and empower students who have shown a keen interest in STEAM.

The event promises a rich experience, commencing with an engaging Q&A session led by technology thought leaders. This will be followed by a range of hands-on activities tailored to cater to students from grades of middle and high school.

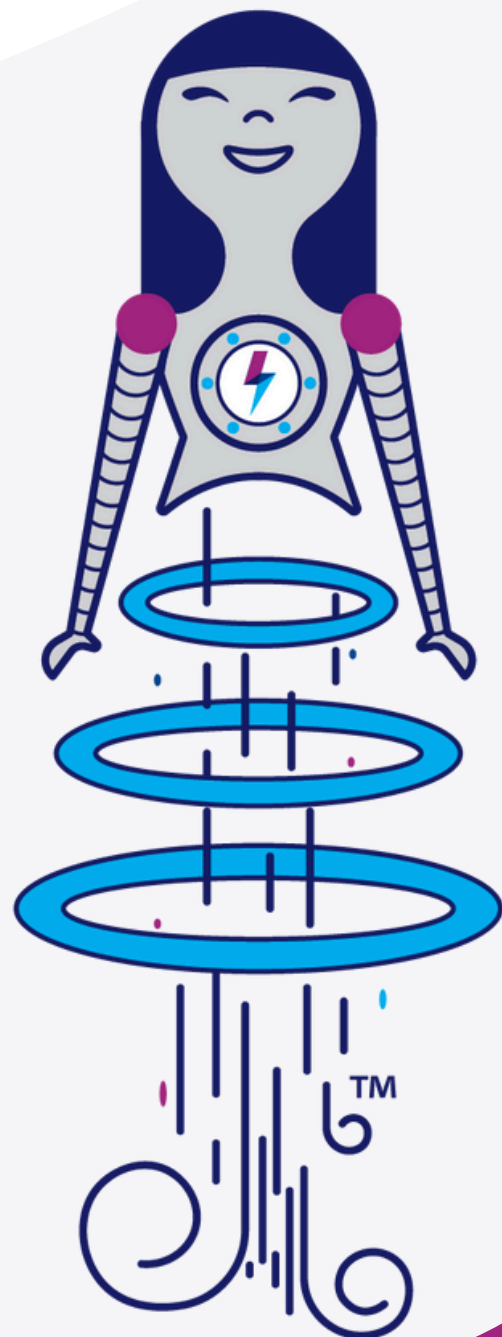

Considering the potential this event holds for our students growth and development in the STEAM fields, we kindly request your understanding in excusing them from any classes or assignments they might miss during this period.

Thank you for your support and understanding in nurturing our future innovators.

Warm regards,

Pedro Alvarado Rentas  
CEO-Caribbean Robotics Academy
